

### **Steps for VS code installation**

✓ How to Install Visual Studio Code

#### 1. Step 1: Download VS Code

Go to the official website:

<https://code.visualstudio.com/>

Click on the "Download for Windows" (or Mac/Linux, based on your OS).

#### 2. Step 2: Run the Installer

After downloading, open the .exe (Windows) or installer file.

Click Next and accept the agreement.

Choose the installation location (default is fine).

On the Select Additional Tasks screen, check:

✓ "Add to PATH"

✓ "Create a desktop icon"

#### 3. Step 3: Finish Installation

Click Install.

Once done, click Finish to launch VS Code.

#### 4. Step 4: First Launch

On the first launch, VS Code may prompt you to install recommended extensions — you can skip or install them based on your needs.

Optional: YouTube Video

You can also watch a video tutorial for installation:
